

Innovative automation for your end of line production

BILA End of Line

The BILA End of Line division supplies automated solutions. We deliver a complete end of line production line to the food industry.

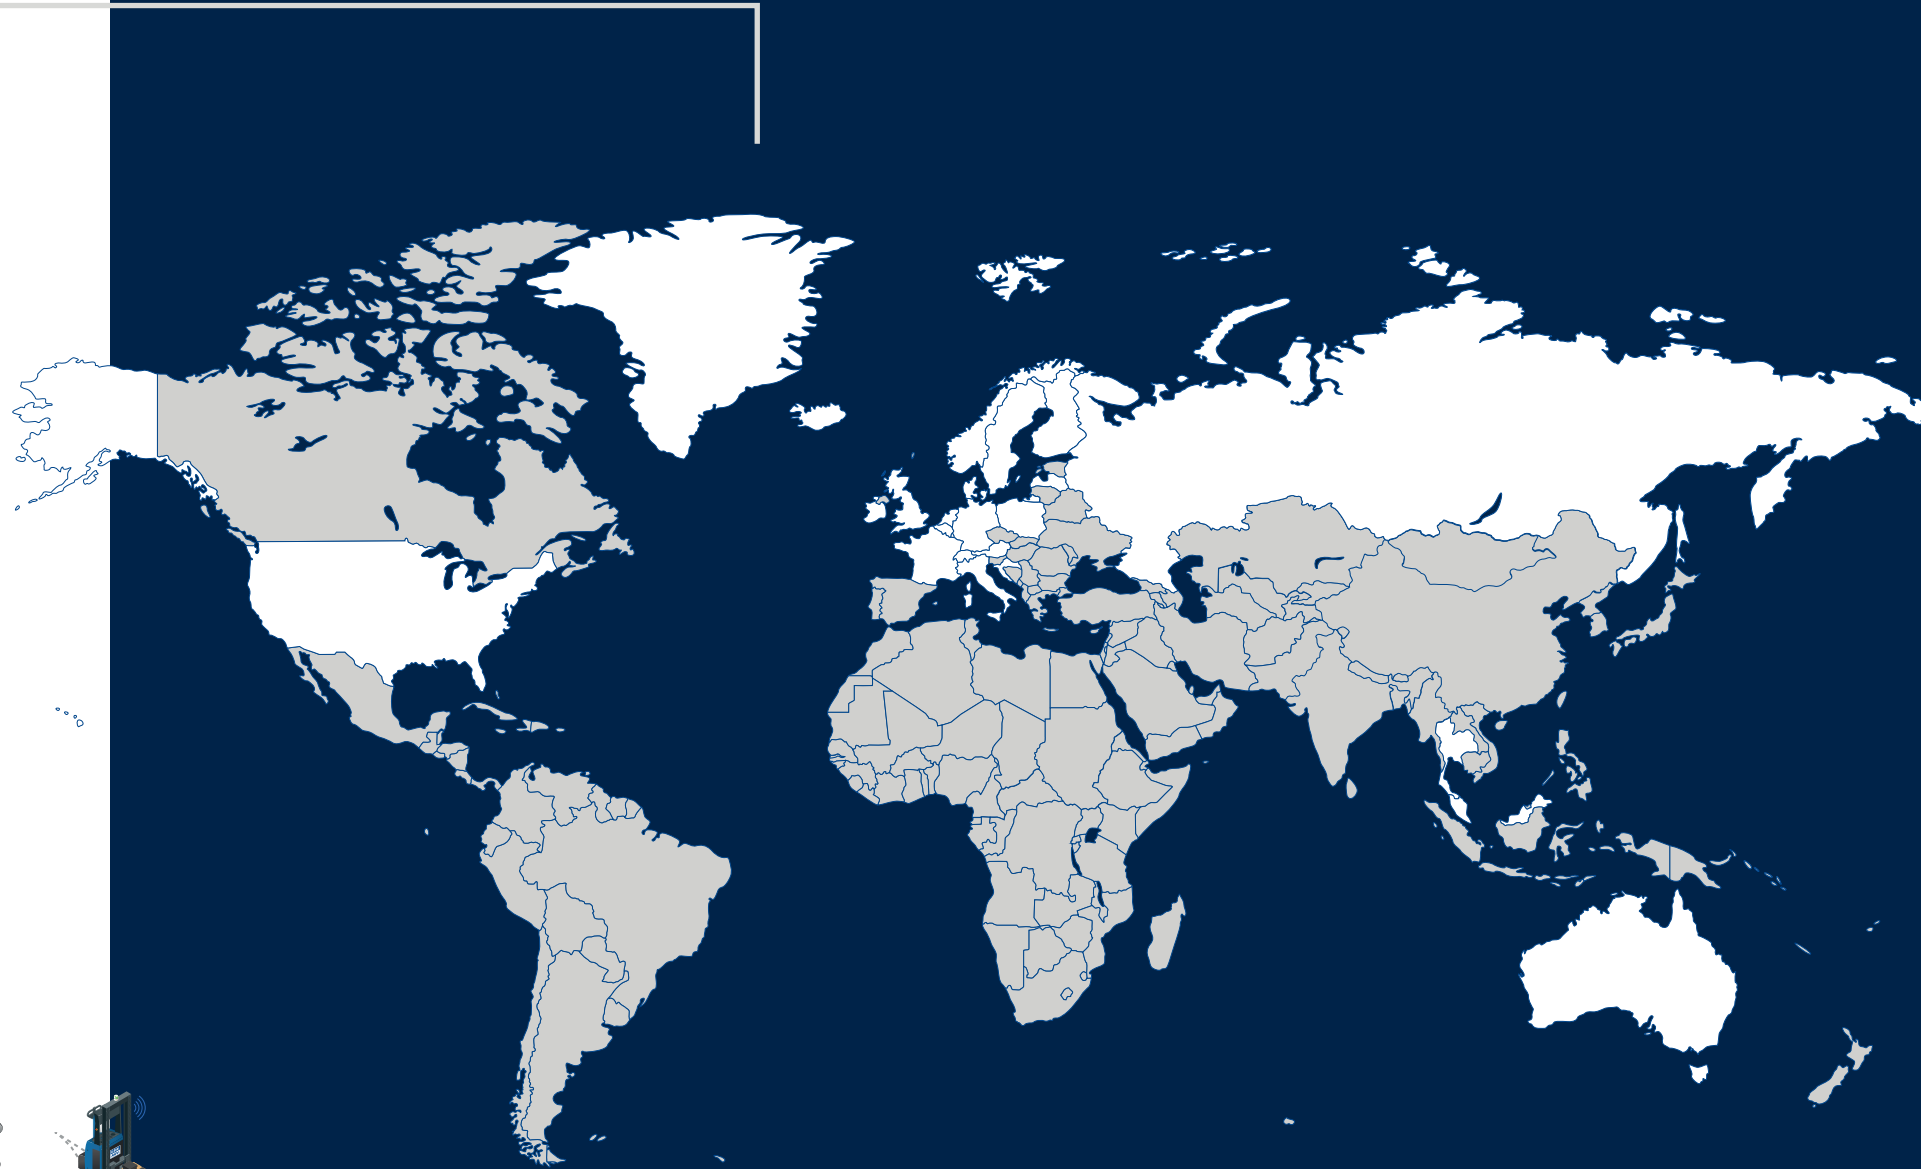

Our end of line division contains BILA End of Line, DAN Palletiser, and REO-PACK approx. 130 employees at 3 locations in Denmark.

BILA End of Line makes customised solutions and projects specialising in optimisation of productions for the food industry.

DAN Palletiser has five different standard machines of layer palletisers, and REO-PACK has four different standard stretch wrappers machines.

Experienced automation partner

Our many years of experience in the development of robotic solutions, helps your business achieve positive results on the bottom line. We provide you with opportunities to automate your production so you can remain competitive.

Pick Pack Palletise

BILA END OF LINE - Everything you need, all in one place

We have the tools to automate even the most complex tasks in both handling and packing food products. We can provide everything from conveyors to vision control, weight control, metal detection, and labelling.

Install a robot on your existing production line without sacrificing flexibility and efficiency. We take care of everything – including necessary modifications – to ensure the system and the robot work seamlessly together.

Working with us, you get:

- › Industry know-how and customised solutions
- › Simple and efficient standard palletising equipment
- › Large volume and special palletising for customer-specific solutions
- › Automation in the process area with a focus on improved competitiveness, hygiene, and work environment
- › Validation of targeted activities via pilot projects, guaranteeing safety in solution calculation, capacity, scheduling, and ROI
- › Increased productivity and competitiveness

Expertise in end-of-line packaging

Thoroughly tested solutions

REO-PACK offers four standard stretch wrappers machines. The stretch wrappers provide solutions for various industries, and we can handle everything from small to large-scale solutions. With our standardised range of stretch wrappers, we can address and streamline the wrapping process for different pallets according to your production needs.

With REO-PACK's extensive experience and expertise in end-of-line packaging solutions, we can offer thoroughly tested solutions that ensure optimal protection and efficient packaging of palletised products.

With operational efficiency, the wrapping process can be significantly streamlined, eliminating unnecessary workflows. Our user-friendly control systems make it easy for the customer to manage.

Working with us, you get:

- › Increased efficiency
- › Strong, reliable, and long-life solutions
- › Installation and commissioning of thoroughly tested equipment before use
- › Development and construction of special solutions and functions
- › A supplier and a partner that can deliver all functions necessary for packing facilities
- › Professional advice and efficient 24/7 hotline service

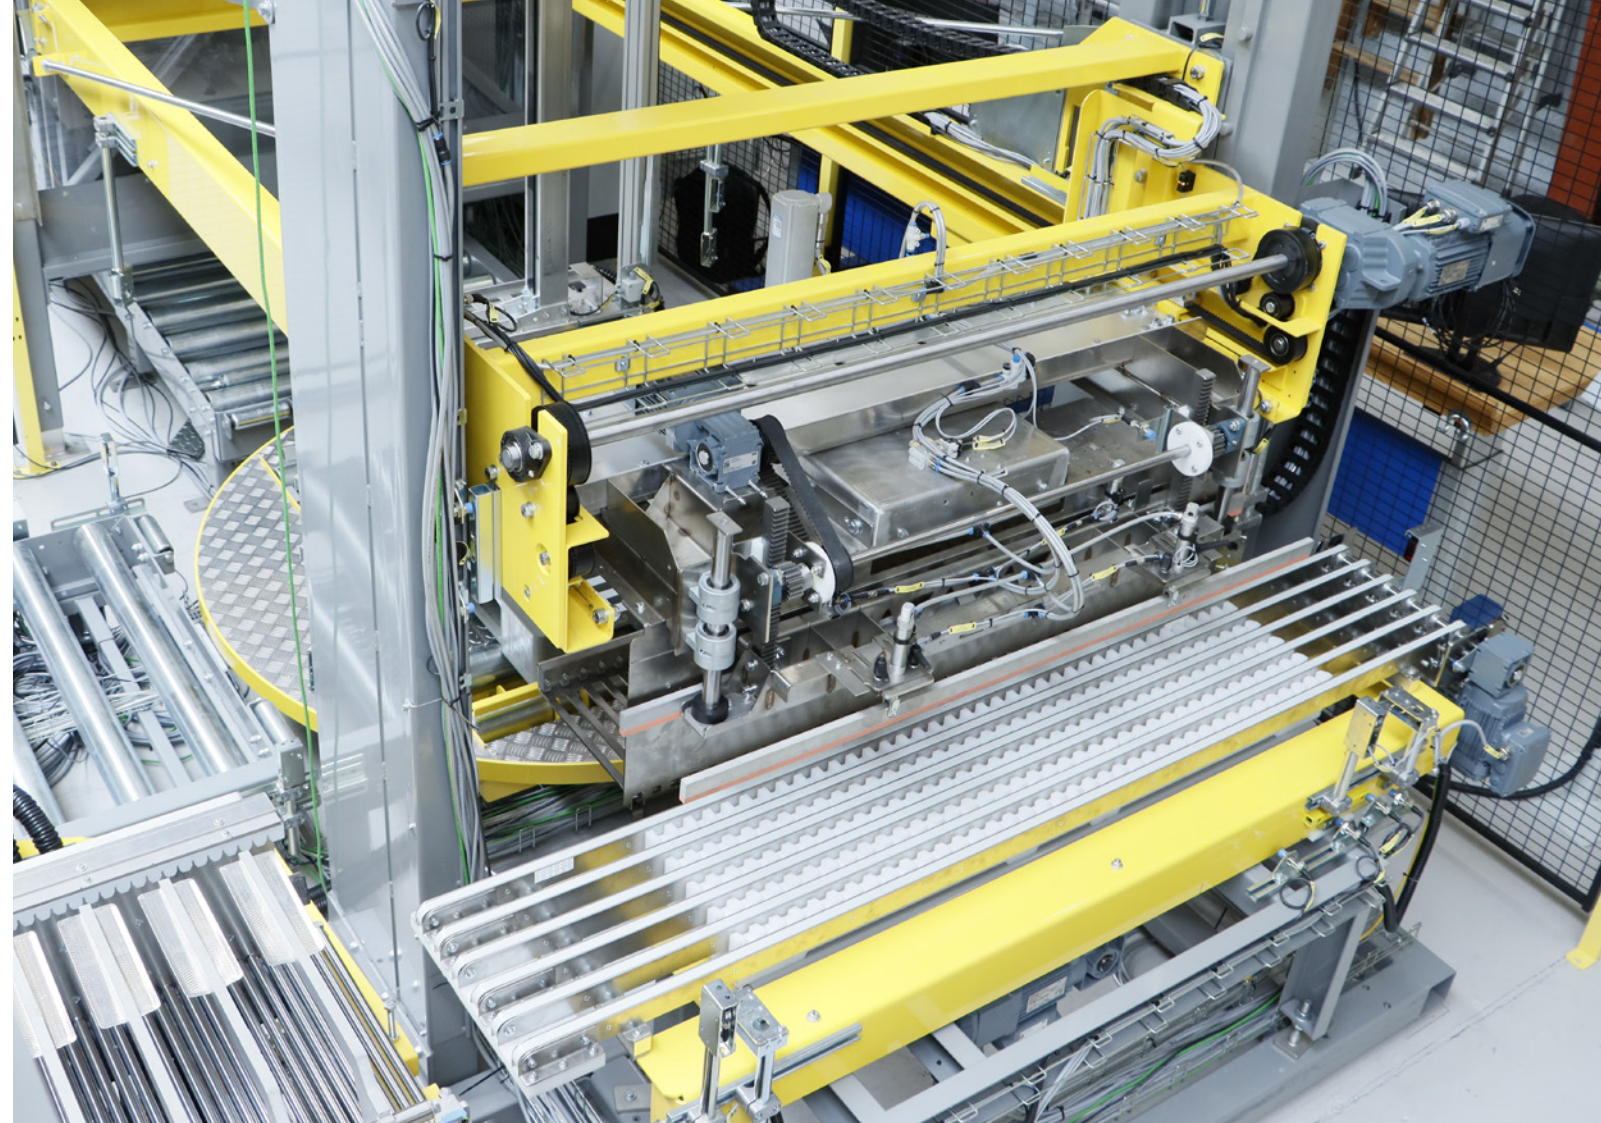

Efficient palletising solutions

High efficiency and easy maintenance

DAN Palletiser offers five standard solutions of layer palletisers. The automated palletisers load conical buckets, boxes, bottles, and many other types of packaging and can ensure high flexibility and efficiency in your production.

DAN Palletiser provides palletising machines to some of the world's largest manufacturers and wholesale companies. A long tradition of first-class and professional craftsmanship ensures our customers world class, proven solutions, developed with a focus on high efficiency and easy maintenance.

Our palletisers helps production companies to ensure efficiency and to remain competitive.

Working with us, you get:

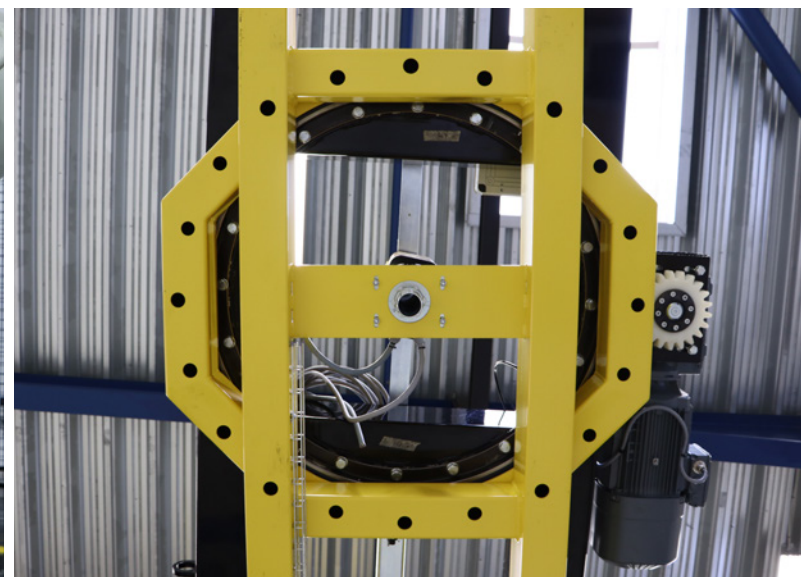

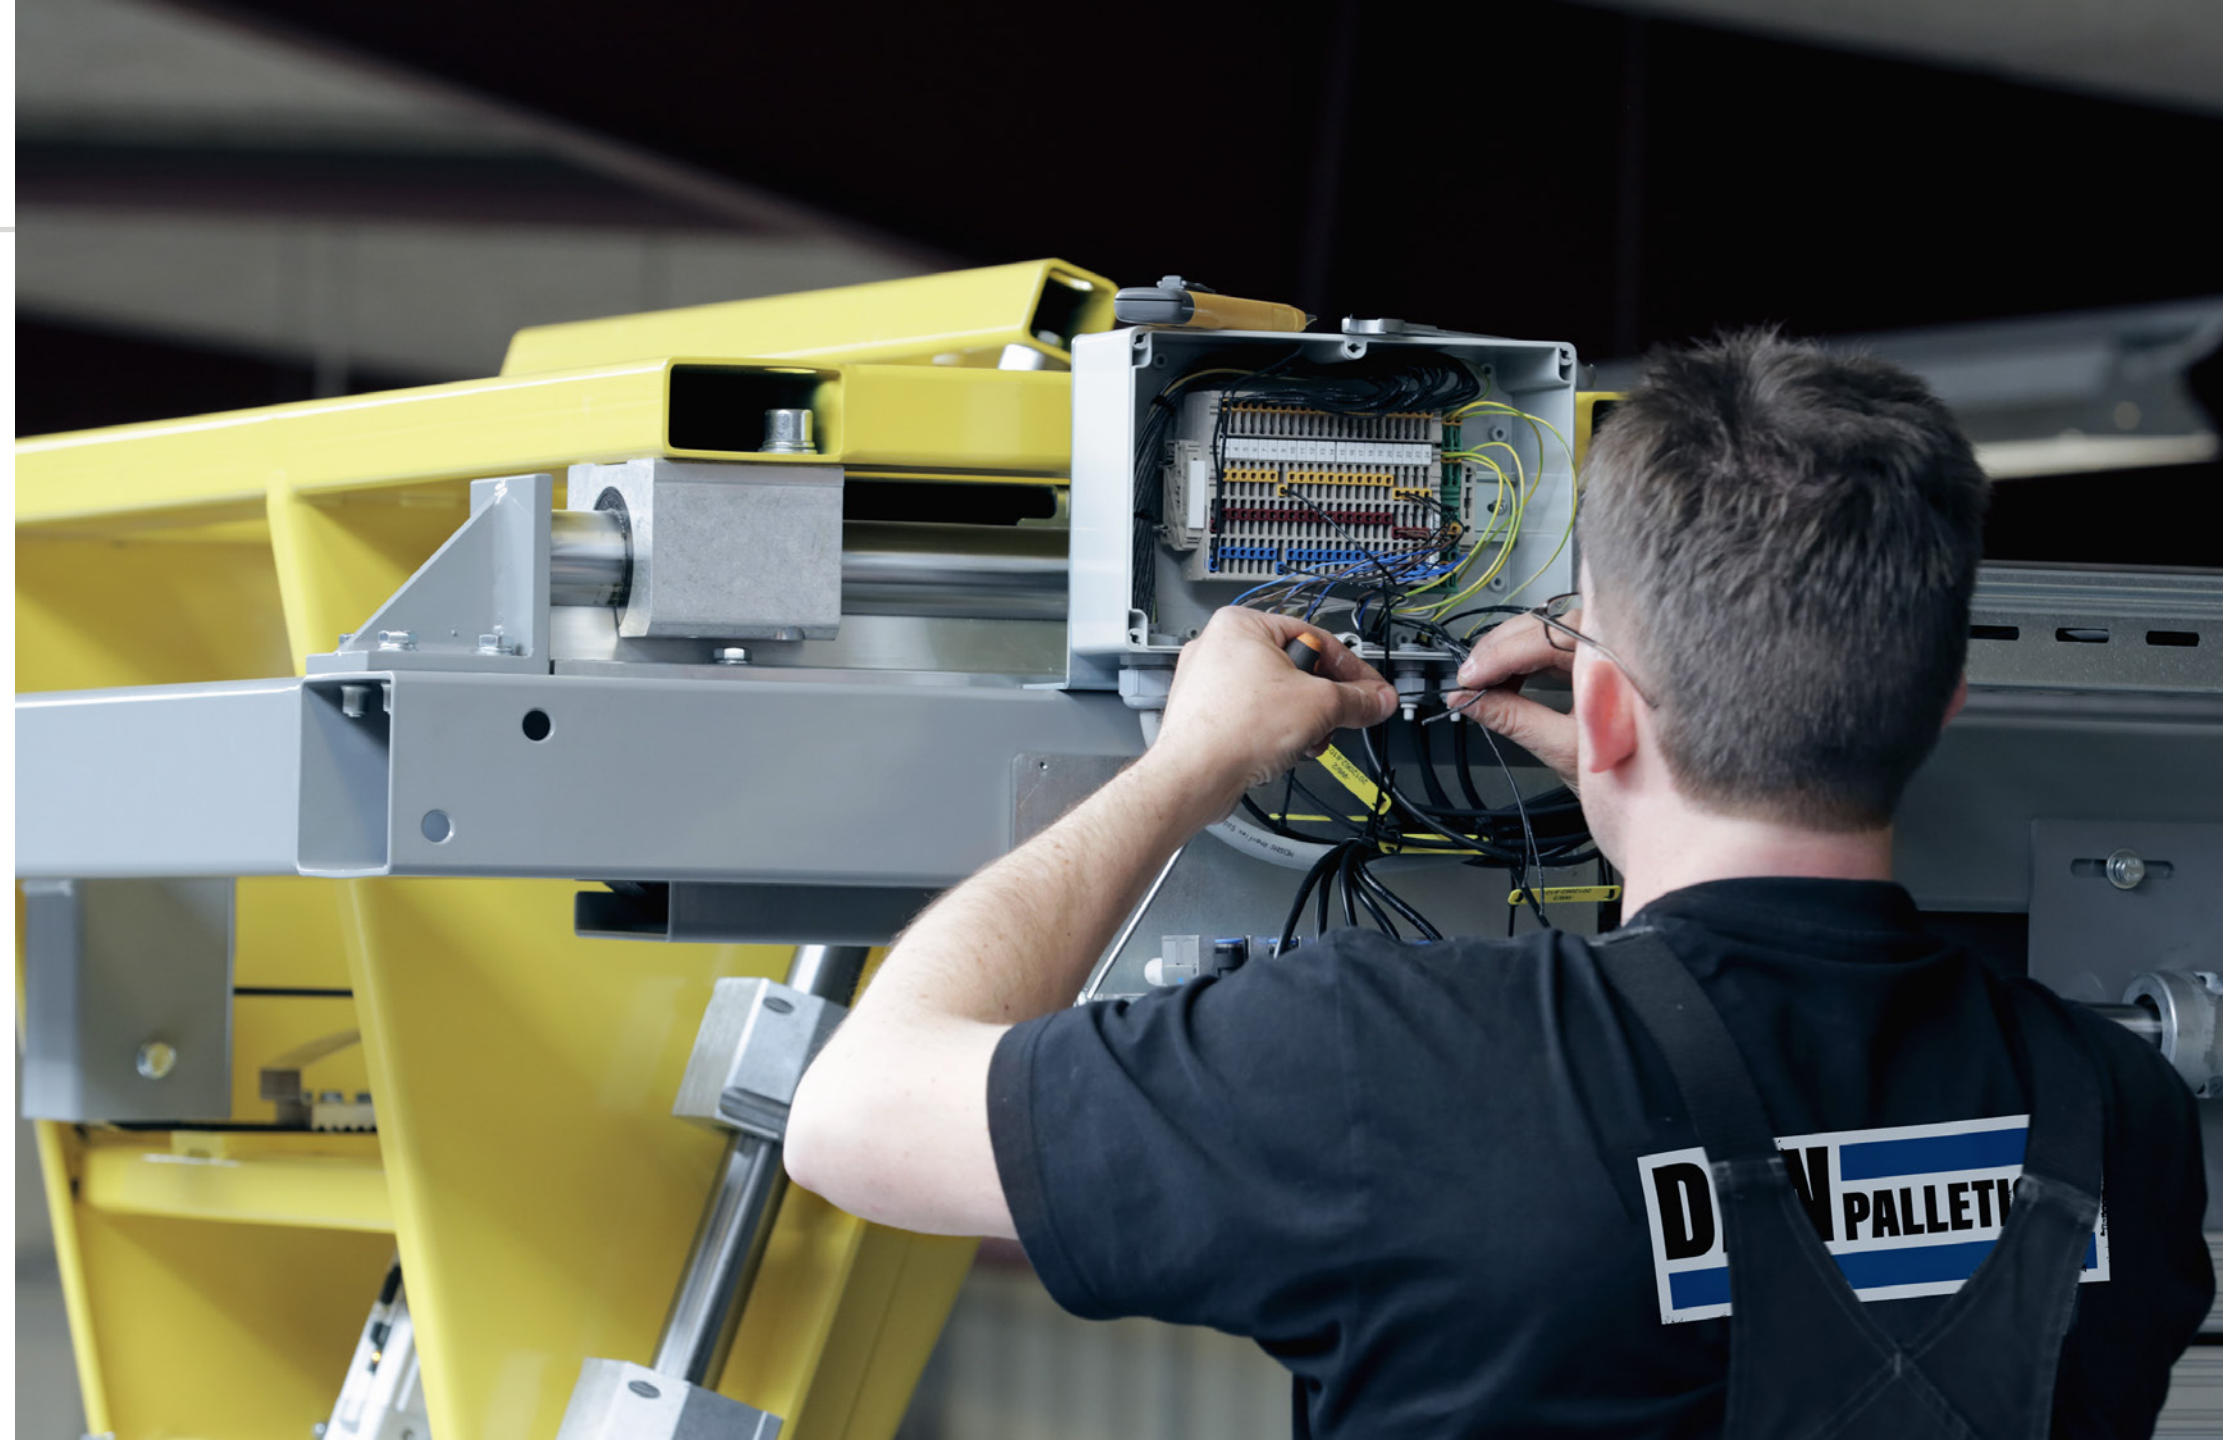

- › Better work environment regarding employee attrition
- › Increased production efficiency
- › High quality in the packing process and correct palletising
- › Optimisation of the packing and palletising processes
- › Quick conversion to new products

BILA Group

- your trusted partner for automation solutions

As a part of BILA Group, we have many years of experience and reliable solutions. We deliver expertise and products that cater to automation needs at every level, and our strength lies in the integrated approach across BILA Group to the benefit of our clients.

We have everything under one roof: from consultation and concept development to construction, assembly, and service. Our solutions span from simple standalone products to optimising entire production lines. Customers can choose logistics products like building blocks, seamlessly assembled into a reliable automation solution.
